

Entech Builders, Inc.

Entech Builders is located in Port Washington.

Our main areas of work are Ozaukee and northern Milwaukee Counties in the North Shore.

Entech Builders employees carry out many responsibilities. Rough framing, finish carpentry, siding and masonry are the primary areas of work but we do a wide variety of other items as well at times. Students can plan to be trained accordingly in the field they wish to continue on in a career.

Our goal and focus is to train students and new employees in a safe and professional manner. Quality is of the utmost importance at Entech Builders as well. We have a good reputation with our clients and want the best for both the client and our employees, all while being safe, prompt, respectful and clean.

Starting out co-op students can plan on being assigned simple tasks and as they accomplish those they will be assigned tasks with more responsibilities.

We look forward to having the opportunity to teach and employ the future tradesman of the world.

*Note: Entech Builders has semester placements available.
